#### (1) NOONDAY ROCK.

The United States Government has given notice, that on examining Noonday rock for the purpose of blasting, two pinnacles were found in its immediate vicinity over one of which 14 feet was found at low water, with deep water between them.

These dangers form one with Noonday rock, which is marked by a buoy.

As it is possible that an irregular ridge may connect these pinnacles of Noonday rock, with North Farallon Island, large vessels are cautioned not to pass between them until a more complete survey of the locality has been made.

#### (2) SUNKEN ROCK OFF CAPE MENDOCINO.

Also, that a sunken rock has been found to exist off Cape Mendocino between the Cape and Blunt reef.

The rock is about one yard in diameter, and has 6 feet on it at low water, it lies S. W.  $\frac{3}{4}$  W. distant 1 7-10 miles from the lighthouse on Cape Mendocino.

NOTE.—The dangers lying off Cape Mendocino are characteristic of several points on the coasts of California and Oregon, and until thorough surveys are made and sailing directions given, vessels should not attempt a passage inside of outlying rocks, and should also give them a good berth in passing outside.
